### A New Face Without Surgical Skin Peeling

"I do not approve of the surgical operation of face peeling," says Julia Orff. "It's too radical, too often dangerous. There's a better way of removing offensive complexion and one that is entirely safe and rational. Ordinary mercurial causes only the most vitalized scar skin to come off, but gradually and gently. Unlike the surgical process, the skin is not forcibly taken off in big pieces all at once, but almost invisible flaky particles are absorbed by the wax, and from ten days to two weeks are required to complete the transformation. There's no pain, no discomfort.

"Nature renews complexion the same way, shedding its cutaneous scales day by day. But deficient circulation, or other abnormal condition, may interfere with the shedding—a 'bad complexion' results. Then mercurial wax assists Nature by hastening the removal of the aged, faded or discolored top skin. Thus only the lively, young, healthy-skinned skin is in evidence, as in robust girlhood. This is why mercurial wax produces the indescribable beauty of ever-renewing youth. The wax is put on at night like cold cream, and washed off in the morning. You can procure it at any druggists; an ounce is sufficient."—Adv.

### ONE FINED FOR SPEEDING

By agreement U. S. Stewart, charged with speeding, was fined \$5 by Judge Ballard Caldwell, of the corporation court, on Tuesday afternoon. The case against William Herold, charged with the same offense, was dismissed. Motorcycle policeman Dan Thompson, who made the arrest, testified that the defendant was driving his car on Montana street at 30 miles an hour, and that it was the first time that he had ever been arrested. The judge warned him and dismissed him.

Santiago Labrador, a Mexican boy, arrested for horse riding trains at the smelter, was liberated by Judge Caldwell upon the promise of the boy's father to give him a sound thrashing.

**IS TAKING HIS TIME IN APPOINTING AN ENGINEER**  
Austin, Tex., April 22.—The governor is taking his time regarding the appointment of an engineer called for under the general legislation bill. He has not yet heard from H. A. Thompson, the engineer of the California railroad commission, to whom he had tendered the position. There is little chance that Mr. Thompson will accept the appointment for the reason that he said his salary in California is \$6000 a year, while that paid to the engineer in the irrigation bill is only \$2500. The governor has received a number of applications for the position, but will be slow in making an appointment.
